

# Man Overboard & Body Recovery

## Man Overboard Cradle Recovery Pole

### Description

High quality, strong and adjustable; the Cradle Recovery Pole is designed for use with any Fibrelight cradles within the range. The system has a strong loop-style body hook for guiding the casualty into the cradle. The opposite end has a boat hook for snagging the cradle netting.

Telescopic cradle recovery pole that extends from 1.7m to 4.7m, used for guiding a body within the water to a recovery cradle, stretcher or other Fibrelight recovery device.

### Specification

- 1 x High Quality Telescopic Pole with Boat Hook End
- 1 x 1m Extension Pole
- 1 x Body Hook End with Retro Reflective Tape
- 2 x Mounting Brackets for securing both the telescopic pole and extension to the side of a vessel or other chosen area.
- 1x Body Hook with hi visibility retro reflective tape
- Pole extends from 1730mm to 4730mm
- Securing clamp which enables the user to operate the pole at any length from 1.7m to 4.7m.
